GATE STYLE GUIDE 2026
TEXAS EDITION

EVERY GATE TELLS A STORY

The 2026 Gate Guide - Texas Edition

This ain't your daddy's gate company.

At Boutwell Steel, we don't just build gates, we forge bold statements from steel, rooted deep in Texas grit. Our Texas Edition line is a tribute to the places that shape us: inspired by cities and counties from across the Lone Star State. From rugged West Texas to the Hill Country, to the East Texas pines, every gate in this collection is named for and inspired by a Texas location that tells its own story.

Crafted right here in Austin, Texas, our gates are:

- ⇒ Tough as the state that inspired them,
- ⇒ Designed with intention, detail, and identity,
- ⇒ Forged for strength, shaped with purpose, and made to matter.

Whether you're securing a ranch entrance, dressing a modern estate, or building a legacy, this collection is where Texas roots meet custom steelwork. We invite you to explore a catalog of craftsmanship built by Texas welders and fabricators.

Welcome to the Texas Edition.

Austin Boutwell and Team
